

As an innovative and internationally operating German family-owned company in the field of surface coating, plastic injection moulding, metal processing and mechanical engineering, the GOTEC Group is a strategic partner of the worldwide automotive industry. On our expansion path we are always sourcing suitable and committed talents and experts. Currently we are searching for a highly motivated and self-driven:

Business Analyst / Project Manager (m/f/o)

Location: Global / Home-Office

Key skills & experience:

We assume that a possible candidate can think and act independently & entrepreneurially, has a structured way of working, strong problem-solving capabilities and is a team-player with hands-on-mentality.

In addition, we require:

- Degree in computer science or completed training as business analyst / requirement engineer with several years of experience in the development of individual software
- Several years of experience as business analyst and / or requirement engineer working with international customers
- Solid knowledge of agile development practices, e.g., SCRUM or SAFe
- Solid knowledge of requirement engineering techniques as well as tools (Jira, Azure DevOps)
- Experience in leading cross functional workshops with customers and developers
- Experience as project manager is a plus
- Language skills: English, Polish, German desirable

Essential Duties and Responsibilities:

If you would like to face the exciting challenges of the automotive industry and if you can keep a cool head even in stressful situations, the following activities and tasks await you after intensive training:

- Support business stakeholders and the development department throughout the whole software development process
- Partner with various plants and business units to increase operational excellence
- Collaborate with business stakeholders across the various departments to understand their current and future goals and objectives from a global perspective
- Lead design workshops, collect and refine business requirements and support Product owners to produce structured user stories
- Work in cross functional teams to implement end-to-end integrations and support our business process application landscape
- Work closely with the development department providing guidance and testing the solutions
- Improve development processes, roles and best practices
- Support day to day business within the IT development department (e.g., Bug handling, testing, documentation)

We offer:

The candidate can expect varied and challenging activities. He / she can be part of a target-oriented community and has the opportunity to support the management in change-processes and performance of the manufacturing.

At GOTEC, you can expect varied and challenging activities in a dynamic team with flat hierarchies, as well as excellent professional development. We provide you with a modern workplace including up-to-date technical equipment and offer an attractive salary package.

Make the next career step now and send your application documents including your salary expectations and the earliest possible starting date in English language to: hr@gotec-group.com
